# Courtney Jones

Front-End Developer

---

## Profile

Experienced javascript developer with 4+ years working/growing in the engineering industry. Proficient in React, accustomed to writing functional components and using Hooks. Experience creating data visualization UI's and continually improving performance of web-app while creating new features and meeting deadlines. Seeking to join a dev team and leverage my experience to push initiatives.

## EXPERIENCE

### Front-End Developer — *Reliant Immune Diagnostics, Austin, TX*

SEP '20 - DEC '22

- Built clean and reusable components in reactjs to meet requirements standards.
- Conducted gradual migration of 100+ files from javascript to typescript in a large project.
- Bug fixes and troubleshooting in production environments.
- Collaborated with designers and back-end developers to plan new features and api's.
- Performed PR reviews for fellow front-end developers.
- Independently developed features from requirement collection to production deployment.

### QA Engineer — *Reliant Immune Diagnostics, Austin, TX*

JAN '19 - JUN '20

- Developed and maintained automated and manual regression test suites.
- Conducted 30+ end user,beta and guerilla usability testing events.
- Provided technical information in stakeholder meetings.
